

open learning center

Description: Voluntary drop in school program in which students can seek help or use computers to complete their school assigned work.

Program Goals:

1. Offer an after school place to do homework.
2. Make computers accessible for students who need them.
3. Provide quality support for students who need help academically.

Time/Date: 3:05 to 4:05 on Monday and Thursday or regular school days. Students are free to leave when they are finished but must sign in prior to 3:05.

We will also pilot 4 Saturdays from 9:00 to 12:00 to determine if there is a need for it. Students are free to leave when they are finished but they must arrive prior to 9:00.

Location: This will be housed in the Library and library computer lab during the week and location will be determined on the weekend based on need.

Staffing: 2-3 staff members will be available to help students. Counselor/teacher approved student volunteers will be sought out to offer support in the future possibly.

We are going to see how it goes and make changes based on needs and issues as they arise. All comments and suggestions are welcome 😊
